/api/graphql

POST

https://docs.qintoravacloud.com/api-reference/api-graphql/

Endpoint

`/api/graphql`. Use the platform base URL for your tenant. Check the active role and tenant before making requests.

POST

One bounded read-only GraphQL query using existing record authorization, tenant and field policies. No mutations, subscriptions or batches.

Operation ID `governedGraphqlRead`

Parameter	Location	Requirement	Description
`request`	body	Required	

request schema

```
{
  "type": "object",
  "required": [
    "query"
  ],
  "properties": {
    "query": {
      "type": "string",
      "description": "Read query document; maximum 16 KiB and 2000 parser tokens"
    },
    "operationName": {
      "type": "string"
    },
    "variables": {
      "type": "object",
      "additionalProperties": true
    }
  }
}
```

Status	Published response
200	Typed data and optional GraphQL execution errors
400	Invalid or oversized read query
403	Session or capability access denied

See API authentication and query examples and Troubleshooting by symptom.
