/api/records/{path=**}

GET, POST

https://docs.qintoravacloud.com/api-reference/api-records-path/

Endpoint

`/api/records/{path=**}`. Use the platform base URL for your tenant. Check the active role and tenant before making requests.

This is a gateway wildcard. Consult the relevant product guide for individual operations and action-specific inputs.

GET

Operation ID `recordCollaborationRead`

Parameter	Location	Requirement	Description
`path`	path	Required	string

Status	Published response
`200`	Authorized bounded record activity, file metadata or scan-cleared content
`403`	Parent access forbidden
`404`	Record or visible file not found

POST

Parent-authorized journal, raw binary upload or reasoned removal. Upload bodies remain application/octet-stream.

Operation ID `recordCollaborationWrite`

Parameter	Location	Requirement	Description
`path`	path	Required	string

Status	Published response
`200`	Idempotent replay or removal
`201`	Journal entry or quarantined file created

Status	Published response
409	Conflicting request or record version
413	File exceeds the governed limit
429	Transfer capacity exceeded

See API authentication and query examples and Troubleshooting by symptom.
