Keyboard navigation

Use **Skip to content** to jump past the header. Use Tab and Shift+Tab for links and controls, Enter to open a link, and Enter or Space to open a topic group. The breadcrumb returns you to the product area and the article's **On this page** links jump to headings on wider layouts.

Use Products or Guides if client-side search is unavailable. The layout reflows on narrow screens. Reference tables can scroll horizontally inside an article. Zoom or enlarge your browser text using your usual browser controls.
