November 2026 documentation release

This edition documents the November 13, 2026 demo baseline. The deployed container identified source revision `01e411fddde6`. It includes the product catalog, how-to guides, troubleshooting, and registry-derived form, CI and integration reference.

How to read the coverage

Reference pages enumerate shipped definitions. Procedures use matching product source and acceptance material. The live administrator walkthrough checked workspace destinations and representative interfaces. Tenant-specific role, connector and data-dependent behavior can differ.

Read the audit scope and evidence
